## Guernsey SASIG

After a three-year hiatus, we can finally return to the Channel Islands. We are always delighted at the size and seniority of our offshore audience and how it increases each time, and we are confident this year will see that trend continue.

We are most grateful to our hosts, Mourant, whose generosity has allowed us to arrange this important meeting, at which we will be discussing a miscellany of security topics for the first time in Guernsey. The agenda has been curated based on local feedback, covering important topics, including keeping up with regulators, threat intelligence, supply chain security, cryptocurrency, and geopolitics.

All SASIG events operate under the Chatham House Rule, and there is no charge to attend. Our hosts will kindly provide refreshments. We look forward to welcoming you to this SASIG event.

**mourant**

**Tuesday 7 February 2023**

**9am to 2.30pm**

**Mourant, Royal Chambers, Royal Ave,  
Guernsey, GY1 1WA**

## Chair

Tarquin Folliss OBE, Vice Chairman, The SASIG

---

**9am**                    **Registration, coffee and networking**

---

**9.30am**                **Welcome and introductions**

**Tarquin Folliss OBE** Vice Chairman, The SASIG

**Matthew Parker** Chief Information Security Officer, Mourant

**9.45am**                **Opening keynote - Keeping up with the regulators**

**Sally Rochester** Director, Mourant Consulting

Despite the constant development of new regulations, many operators are ill-prepared for new laws. In heavily regulated industries such as financial services and gaming, it's vital that we can be agile and ready for change. Sally examines how to stay up to date with new regulations, how to approach meeting those regulations and what to do when deadlines can't be met.

**10.15am**              **Threat intelligence briefing**

**Bradley Boshier** Senior Systems Engineer, Varonis

How secure are your business data, systems, and networks? Cybercrime is on the rise, and it's vital to understand where your organisation stands in the face of emerging threats, how these work, and how we can prevent them, to keep our data secure. We look at the latest risks facing businesses today and where these trends are heading. We consider the current state of cybercrime, with key takeaways on how your organisation can best protect itself.

**10.45am**              **Panel session – Supply chain**

Facilitated by **Justin Bellinger** Guernsey Chief Executive, Sure

**Carl Ceillam** CEO and Founder, The Chain

**Paul Torode** Group Head of Information Security & IT Governance, First Central

**Bert Pereira** Head of IT, Investec Bank

An increasing number of organisations are suffering cyber attacks via their supply chains or their IT service providers. How do we improve cybersecurity in supply chains, especially in the complex health sector, and protect our soft underbelly from threat actors and other dangers to our resilience?

---

**11.45am**              **Tea, coffee and networking break**

---

**12 noon**

**Panel session - To cloud or not to cloud**

Facilitated by **Tarquin Folliss OBE** Vice Chairman, The SASIG

**Bradley Boshier** Senior Systems Engineer, Varonis

**Matthew Parker** Chief Information Security Officer, Mourant

**Mark James** Senior Manager, ESET

Are you ready to take a leap into 'The cloud'? Cloud storage is providing an increasingly significant part of our businesses' technology infrastructure. We consider the benefits of cloud storage and the security issues we should bear in mind when considering a cloud solution. Whether you are ready or not, we will understand better what it means for your security and how to make the transition to an online data centre as smooth as possible.

**1pm**

**A dangerous point in history – Geopolitics, technology and the evolution of threats**

**Tarquin Folliss OBE** Vice Chairman, The SASIG

The world feels like a more dangerous place: a major war in Europe with repercussions across the world, the legacy of a pandemic, rampant inflation, an energy crisis and the potential for famine in the poorest countries. The Russo-Ukraine war is only one manifestation of geopolitics' influence on our lives. In an increasingly polarised world, our strategic challenges appear more daunting. Technology has been a significant enabler for us and those who wish us ill. The new Cold War we seem destined to experience will only exacerbate this. Tarquin Folliss will focus on the influence of geopolitics, its inconvenient truths, and the evolving technologies our adversaries deploy to compound the crises we face.

---

**1.30pm**

**End of meeting. Networking luncheon**

---

# About

## The Security Awareness Special Interest Group (SASIG)

SASIG is a subscription-free networking forum, membership now represents hundreds of organisations of all sizes from across the world and from all sectors, public and private. Its 7,500+ membership is drawn from CIOs, CISOs and their staff with responsibility for cybersecurity within their organisations. Professionals from other disciplines (risk, HR, legal, supply, etc.) and representatives from government, law enforcement and academia are also being increasingly welcomed at events. The Chatham House Rule is strictly enforced and universally respected at all meetings, and vendors and the Press are routinely excluded. Thus, the level of debate is extraordinarily revealing and rewarding.

SASIG has a members' website at [www.thesasig.com](http://www.thesasig.com). Please register here for membership.
