

Platinum Partner  **exabeam™**

## Introducing Exabeam as our Platinum Partner for 2025

We are thrilled to introduce Exabeam as our esteemed Platinum Partner this year. With their commitment to continuous innovation and excellence, Exabeam is empowering security teams to navigate the ever-changing threat landscape with unparalleled confidence and efficiency.

### Pioneering the future of cybersecurity

Since its launch in 2014, Exabeam has redefined what it means to secure digital environments. With cutting-edge technology and a forward-thinking mission, they're empowering security teams to detect, investigate, and respond to threats with speed and precision.

And now, with the strategic merger with SIEM vendor LogRhythm in 2024, Exabeam has become an even more formidable force in the cybersecurity industry.

### What sets Exabeam apart?

#### It's not just about the tech - it's the vision.

For over a decade, Exabeam has been a global leader in AI-driven security operations, fundamentally redefining how organisations approach threat detection, investigation, and response (TDIR).

By combining real-time threat intelligence with advanced behavioural analytics, their solutions break down organisational silos and supercharge incident response, including the ability to detect insider threats, one of the most costly forms of cyberattack.

“Exabeam solutions don't just help you respond to threats, they give you the confidence to thrive in a digital world.”

Whether it's advanced TDIR driven by AI and automation in the cloud, compliance with a self-hosted SIEM, or a hybrid of the two, Exabeam has you covered. Their New-Scale Security Operations Platform for SIEM and UEBA applies AI and automation to security operations workflows to deliver the industry's premier platform for TDIR.

And the Exabeam impact doesn't stop with their products, their community engagement is just as powerful. Through their thought leadership and educational partnerships, like their collaboration with CSE Connect and The National Museum of Computing, they're helping to close the cybersecurity skills gap, ensuring a smarter, stronger next generation of cyber professionals.

# Exabeam at Big SASIG

## AI agents and actionable insights

Big SASIG 2025 is more than just an event, it's a hub for the brightest minds in security. For Exabeam, it's the perfect opportunity to share what's next for the industry.

**“Big SASIG offers us a platform to connect with professionals, share insights, and tackle cybersecurity challenges together.”**

Kev Eley, VP for UKI at Exabeam

Meet the team at their stand (pre-book a one-to-one meeting or stop by on the day) and hear from Kev in his **powerful workshop**:

### Navigating agentic AI: Strategies to safeguard your organisation from cyber risks

AI is both a shield and a sword - offering cutting-edge tools to protect, but also new vectors for attack.

With **real-world examples**, we'll explore how businesses have used AI, the challenges faced, and key lessons learned in building resilient frameworks and advanced defences to protect against evolving threats.

10am in the Engage Hub (at Big SASIG 2025, Thursday 8 May) - **book now!**

## What's next for Exabeam?

With a purpose to deliver comprehensive, best-of-breed security operations solutions that drive real, impactful outcomes, Exabeam continues to accelerate innovation across its platforms.

Exabeam Nova, the industry's most dynamic AI agent, is the latest example of their dedication to enable SOC teams to remain one step ahead of the ever-evolving threat landscape.

By focusing on AI-driven security solutions, thought leadership, and educational partnerships, Exabeam aims to empower the cybersecurity community to navigate the complex landscape effectively, turning challenges into opportunities for enhanced security and resilience.

As Big SASIG 2025 approaches, Exabeam invites you to connect, collaborate, and explore how to build a stronger, smarter cybersecurity future.

**“The future of cybersecurity lies in collaboration, intelligence, and relentless innovation.”**

**Don't miss your chance to meet the Exabeam team at Big SASIG.**
